Whitworth Scholarship Awards Scheme

FOR ALL DISCIPLINES OF ENGINEERING

Could engineering apprentices use up to £36,00 on their personal development, to achieve Chartered Engineer Status?

The Whitworth Awards Panel believes that they can and are prepared to support suitable students and graduates who have been Engineering Apprentices to undertake further studies, to achieve Chartered Engineer Status.

Help us find aspiring engineering apprentices

The Whitworth Awards Panel requires assistance from the Engineering Industry toraise awareness that there is assistance available to engineering apprentices to undertake a degree course, to achieve Chartered Engineer Status.

The Whitworth Awards Panel has been entrusted with carrying out the wishes of one of the greatest engineers, Sir Joseph Whitworth, by awarding scholarships in his name valued up to £36,000 for the duration of study for an engineering degree course.

The Panel is looking for engineering apprentices with at least two years "hands on engineering training" who have already/or will have obtained the relevant qualifications to allow them to study an engineering degree-level course.

With Tuition Fees the argument can be seen, why apprentices are not prepared to give up a job with a good salary to go and study for an engineering degree. The Whitworth Scholarship Awards Scheme could be the answer for aspiring engineering apprentices who wish to become Chartered Engineers.

A Typical Candidate must be able to demonstrate to the Panel that they have excellent academic and practical skills along with qualities needed to succeed in industry.

Do you know of Anyone?

The Whitworth Awards Panel have been investing in engineers since 1868, and wish to continue to do so as we believe engineers are the future.

If you can help us please let us know by emailing me at:

awards@whitworthscholarships.org.uk

Dr Karl Dearn WSch, WSSch, Chair, Whitworth Awards Panel.

Whitworth Scholarship Awards

(up to £9,000 p.a.)

Conditions

Whitworth Scholarship Awards

(for undergraduate engineering degree-level courses including MEng and MSc courses) are offered in competition to:

- Outstanding engineers who have pursued a vocational training route in an engineering discipline for at least 2 years after having left full-time education and before entering a degree-level engineering course
- Who have obtained or will obtain an appropriate qualification for admission to the planned engineering degree-level programme
- Who are British, Commonwealth or European Union citizens, normally resident in the United Kingdom prior to starting their degree-level course

Whitworth Scholarship Awards are also offered to students who meet the above conditions and:

- Are already on an engineering degree-level programme, or
- Are engineering graduates who wish to further their academic qualifications by completing MSc courses. (Graduates must have had two years' industrial experience before commencing their undergraduate engineering degree-level programme.)

Value of Awards

Full-time Study	Full-Time Study	Part-time Study
£9,000 per annum.	The award is paid on a pro rata basis.	The award will be paid on a reduced basis, normally £3,000 per annum.

The Whitworth Award will not exceed a total of £36,000 for any individual. The Whitworth Award may be held in conjunction with other awards (except other Whitworth Awards).

Whitworth Scholarship Awards

CLOSING DATE FOR APPLICATIONS 31 JULY

Whitworth Senior Scholarship Awards

(up to £15,000 p.a.)

Conditions

Whitworth Senior Scholarship Awards for Postgraduate Research leading to a PhD or EngD are offered in competition to:

- Outstanding engineers who have pursued a vocational training route in an engineering discipline for at least 2 years after having left full-time education and before entering a degree-level engineering course
- Who have obtained or will obtain admission to, or have already commenced, a postgraduate research degree programme
- Who are British, Commonwealth or European Union citizens, normally resident in the United Kingdom prior to starting their research course.

Only one Senior Scholarship Award can be granted to an individual.

Value of Scholarship

The award is presently set at up to £15,000 p.a. for a maximum period of three years. Candidates who propose undertaking part-time research at university will have the award adjusted accordingly to reflect the proportion of time spent at the university.

Whitworth Senior Scholarship Awards

CLOSING DATE FOR APPLICATIONS 31 JULY
